SUMMARY

Artificial Intelligence student with strong interest in AI development, machine learning, and data analysis. Skilled in building AI applications using Python, Generative AI, and automation tools with experience in data visualization and model development. Developed AI-powered projects including study assistant, placement preparation agent, and investigation intelligence application. Passionate about solving real-world problems through AI, data analytics, and scalable software solutions.

EXPERIENCE

AI/ML Intern

(April 2026 – June 2026)

Edusills (Google for Developers Program) | Present

- Applied machine learning concepts to real-world datasets for analysis and insights
- Worked on Python-based data analysis and model-building tasks
- Implemented techniques such as feature extraction and pattern recognition
- Developed practical understanding of ML workflows, data preprocessing, and evaluation

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence
(Expected 2028)

(Sep 2024 – June 2028)
India

PROJECTS

StudyFlow AI – AI-Powered Study Assistant

(August 2026 – Present)

Tech: Python, Generative AI, RAG, AI Agents

- Developed an AI-powered study assistant to provide personalized and context-aware learning support.
- Implemented Retrieval-Augmented Generation (RAG) concepts to deliver accurate and relevant responses.
- Designed agent-based workflows to handle study-related queries and resource recommendations.
- Built a scalable architecture capable of integrating multiple AI agents for enhanced learning experience.

Placement Preparation Agent

(July 2026)

Tech: Gemini API, n8n, Docker

- Developed an AI-powered placement preparation assistant using Gemini API for personalized guidance.
- Designed automated workflows with n8n to streamline preparation tasks and user interactions.
- Implemented automated email delivery to send personalized preparation content and updates.
- Containerized the application using Docker for consistent and portable deployment.

CaseFile – Investigation Intelligence

(September 2026)

Tech: Python, Streamlit, Generative AI, AI/ML

- Developed an AI-powered investigation intelligence application for organizing and analyzing case data.
- Built an interactive Streamlit interface to present case details, insights, and relevant evidence.
- Integrated AI capabilities to assist with information analysis and investigation-oriented insights.
- Designed the application as a practical tool for structured case analysis and decision support.

SKILLS

Programming: Python, Data Structure & Algorithm (Python), SQL.

Machine Learning & Data: Machine Learning, Supervised Learning, Regression, KNN, Model Evaluation, Data Analysis, Data Visualization.

Libraries: Pandas, NumPy, Matplotlib, Scikit-Learn.

Tools: Git & GitHub, Jupyter Notebook, VS Code, Power BI, Streamlit, n8n, Docker.

Soft Skills: Problem Solving, Analytical Thinking, Communication.

CERTIFICATIONS

- Data Science & Business Intelligence roles are evolving with Agentic AI.
- C & C++ Programming

(19-March 2025)
(July 2024)
